Any marine surveyor can tell you he or she has seen plenty of boats that made the switch from gas to diesel engines. Diesels are superior in many ways, ranging from reliability to fuel efficiency. So when Jim Curley, the owner of a New Jersey Pontiac and GMC Truck dealership, picked up a Bertram 31, Curley's main objective was to replace the existing 454-cubic-inch gas blocks with a pair of ...

Torque is the twisting power of an engine, and of course a prop needs torque. This is especially true for larger, heavier boats. A diesel engine puts out more torque than a petrol one. Therefore, the heavier the boat, the stronger the argument for diesel compared to petrol. So – let's answer the question we asked at the beginning.

The OXE Diesel is the only outboard engine built particularly with commercial users in mind. It is designed for those who use their boat every day, no matter the conditions, and have to rely on the units for many hours every year. The innovation fills a new segment in the marine industry and cannot be compared to anything on the market today.
