First published in 1989 as Tuning New Generation Engines, this best-selling book has been fully updated to include the latest developments in four-stroke engine technology in the era of pollution controls, unleaded and low-lead petrol, and electronic management systems. It explains in non-technical language how modern engines can be modified for road and club competition use, with the emphasis on power and economy, and how electronic management systems and emission controls work.

This fully revised and updated edition is one of the most comprehensive references available to engine tuners and race engine builders. Bell covers all areas of engine operation, from air and fuel, through carburation, ignition, cylinders, camshafts and valves, exhaust systems and drive trains, to cooling and lubrication. Filled with new material on electronic fuel injection and computerised engine management systems. Every aspect of an engine's operation is explained and analyzed.

This accessible text and practitioner resource provides a complete introduction to the art and science of cognitive-behavioral therapy (CBT). In a witty, straight-talking style, David F. Tolin explains core concepts and presents effective techniques for addressing the behavioral, cognitive, and emotional elements of psychological problems. Vivid examples of several clients are followed throughout the book, which concludes with three chapter-length case illustrations. Readers gain essential skills for conceptualizing a case, planning treatment, and conducting therapy, from intake to termination. Reproducible forms and worksheets are included; purchasers get access to a Web page where they can download and print all 39 reproducible tools in a convenient 8 1/2" x 11" size. Pedagogical Features \*Numerous engaging sidebars: Try This, The Science Behind It, Adapting the Process, and more. \*End-of-chapter Personal Target Worksheets that enable self-practice of core CBT skills. \*Quick-reference definitions of key terms.
