This 2-volume set constitutes the refereed proceedings of the 9th Iberian Conference on Pattern Recognition and Image Analysis, IbPRIA 2019, held in Madrid, Spain, in July 2019. The 99 papers in these volumes were carefully reviewed and selected from 137 submissions. They are organized in topical sections named: Part I: best ranked papers; machine learning; pattern recognition; image processing and representation. Part II: biometrics; handwriting and document analysis; other applications.

Details how two distinct approaches to pleasure and pain--promotion- and prevention-focused--offer insight into how to motivate and influence others, and describes how to both change focus and use focus to achieve specific results.

"The Green Audio Guide: Sound Ideas for a Sound Planet" explores what we can do as audio enthusiasts and music professionals to bring about positive change in the environment. It provides a broad overview of why this issue effects the audio community and describes the practices that each of us can employ to reduce our respective carbon footprints. It also includes a thorough discussion of green renovation and construction techniques for a recording studio -- amateur or professional.

This book takes the reader on a grand tour of the empirical research concerning the personality trait of appreciation of beauty. It particularly focuses on engagement with natural beauty, engagement with artistic beauty, and engagement with moral beauty. The book addresses philosophers' thoughts about beauty, especially the special emphasis on the intimate relationship between love and beauty; appreciation of beauty from an evolutionary standpoint; and the emerging science of neuroaesthetics. The book concludes with a consideration of beauty and pedagogy/andragogy, as well as methodologies to increase appreciation of beauty.

During the Progressive Era, a time when the field of design was dominated almost entirely by men, a largely forgotten activist and teacher named Louise Brigham became a pioneer of sustainable furniture design. With her ingenious system for building inexpensive but sturdy (box furniture) out of recycled materials, she aimed to bring good design to the urban working class. As Antoinette LaFarge shows, Brigham forged a singular career for herself that embraced working in the American and European settlement movements, publishing a book of box furniture designs, running carpentry workshops in New York, and founding a company that offered some of the earliest ready-to-assemble furniture in the United States. Her work was a resounding critique of capitalism's waste and an assertion of new values in design/values that stand at the heart of today's open and green design movements.

Have you ever wanted to know what the future has in store. If the answer is yes then this might be the answer. The machine oracle is based upon an ancient machine originally designed to rid a tormented home of evil spirits. The machine was ahead of it's time, part machine and part alive. Many decades later, the machine became the property of an institution that studied such miraculous devices. It had long since ceased to function, but it was discovered that the parts of the machine were in fact still quite psychic. In this oracle we see a marriage of the organic and the mechanical, the psychic and the scientific. You can learn about and use the oracle, simply by selecting numbers, zero to 25 and then reading about the appropriate card. Within this book you are also provided with easily removable full colour cards so you can start right away.

DHEA and the Brain reviews a range of existing studies regarding DHEA administration to animals and humans. Chapter authors evaluate DHEA metabolism in tissues and organs, explore DHEA effects in the liver that may be of importance to the brain, and discuss recent findings regarding how DHEA is made in the brain. New perspectives about the neuropro

Finger plays, jingles, and musical games provide entertainment for the nursery.
