Nissan X Trail 25 Engine
Engines. Available only in the Japanese market is the SR20VET that produces 206 kW (280 ps) and is used in the X-Trail GT. The Australian model is powered by a QR25DE 2.5 L four cylinder engine initially producing 132 kW (177 hp). From January 2006, the Australian spec engine was detuned to 123 kW (169 hp).

Nissan X-Trail - Wikipedia
Its 2.5 litre engine is a naturally aspirated, double overhead camshaft, 4 cylinder unit that produces 169 bhp (171 PS/126 kW) of power at 6000 rpm, and maximum torque of 233 N·m (172 lb·ft/23.8 kgm) at 4000 rpm. The engine powers the wheels through a continuously variable 'box.

<div>2020 Nissan X-Trail 2.5 Tekna 4WD specifications...</div> <div>The Rogue has been announced in the US with just one engine option: a 2.5-litre four-cylinder petrol. It's likely that when badged as an X-Trail for the UK market, the car will use a range of smaller petrols and diesels – and, possibly, a plug-in hybrid using technology from Nissan's alliance partner Mitsubishi.</div>

<div><div>Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters.</div></div>
<div>As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada' s automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler' s days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There' s only one Saturn you should buy. Toyota – enough apologies: "when you mess up, ' fess up."</div>
<div>It' s a proverbial battle of David versus Goliath. A senior government employee has been embroiled in a bitter battle against one of the country' s largest financiers, Wesbank. His story is mired in alleged fraud, corruption and misconduct. The Grahamstown High Court this week dismissed with costs an appeal by Wesbank, a division of FirstRand – for the third time – against earlier rulings made in favour of Mzukisi Ndara. In the pursuit for justice, Ndara has approached several high-ranking politicians. Parliament as the custodian of the country' s laws, the Hawks and the courts. But 15 years into the battle, the matter has yet to be resolved. And some dockets containing vital evidence have gone missing Ndara has now turned to the Director of Public Prosecutions as a last resort. – Long and Winding Road for Justice: Bulelwa Payi; Weekend Argus, March 19, 2019 Based on your statement, together with police evidential material and the circumstances of this matter, Wesbank and or its employees breached the contract in the form of misrepresentations and acted in violation of various statutes as alluded to in your reports. – National Director of Public Prosecutions (NDPP) Advocate Shamila Batohi; September 24, 2019 Your story needs to be told for business and government to understand they can' t keep turning a blind eye to their people who believe the end justifies the means regarding profit making. – Professor Thuli Madonsela; June 4, 2020 A seventeen year journey of sheer guts and resilience... - Dr Charity Hove October 6, 2021 It is a baffling, bewildering and unsettling story best summarized by your insightful self-observation (Part One: page 31). ' my inner desire for truth' . You write with fluency and power, the first part of your account, embracing your earlier life, is amusing, wry, entertaining and in parts engrossing. The later parts make for more challenging reading, because of the anguish of the cumulating injustices, delays, lawyerly and institutional disingenuousness and evasions you suffered. Your account is truly a Dickensian tale of the law' s delays and obscurities, of lawyers and journalists' evasions, with very occasional light points of courage, loyalty and competence. – Retired Constitutional Court Justice, Edwin Cameron, September 6, 202</div>

<div><div>This compendium of everything thats new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select whats safe, reliable, and fuel-frugal.</div></div>
<div>Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation)Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underwayEthanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive EngineersGM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade agoYou can save \$2,000 by cutting freight fees and "administrative" chargesDiesel annual urea fill-up scams cancel you \$300, including an \$80 "handling" charge for \$25 worth of ureaLemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki</div>
<div>A solution to the climate and energy crisis The reversible fuel cell (RFC) described in this volume stores solar energy and thereby makes it continuously available. This can make the building of energy-free homes and all electric transportation a reality. The foldout drawing at the back of this book also describes the detailed design of the world' s first 1,000 megawatt solar-hydrogen power plant. How is this possible? Our planet receives more solar energy in an hour than humans use in a year. In fact, 5% of the Sahara could meet the total energy requirement of mankind. This energy can then be stored and transported in the form of hydrogen. Converting from an exhaustible energy economy to a clean, free, and inexhaustible one In this timely book, author Béla Lipták explains why a solar-hydrogen economy is technically feasible and cost-effective. He first outlines existing conservation technologies and renewable energy processes as well as evolving technologies, such as energy-free homes, roof shingle solar collectors, and RFCs. He goes on to discuss energy optimization techniques that could reduce the global energy consumption by one third and finally presents the detailed design of a full size solar-hydrogen power plant. It is time to harness the power of solar energy With global energy consumption quadrupling in the last fifty years and atmospheric carbon dioxide reaching the highest level ever recorded, now is the time to prevent further damage to the planet and ensure the survival of human civilization. It is debatable how much time we have before our fossil and uranium deposits are exhausted. It is also debatable how much climate change we can live with or how much of our economic resources should be devoted to stabilizing and reversing mankind' s growing carbon footprint. What is not debatable is that our resources are exhaustible and that we must not give reason for our grandchildren to ask, "Why did you not act in time?".</div>
