The Opel cam-in-head engine (CIH) is a family of automobile engines built by former General Motors subsidiary Opel from 1965 until 1998. Both four- and six-cylinder inline configurations were produced. The name derives from the location of the camshaft, which was neither cam-in-block nor a true overhead camshaft.

~~Opel cam in head engine~~ — Wikipedia

Opel's Cam-In-Head Engine May 3, 2013 by Matt As with single-point fuel injection, the design of Opel's cam-in-head (CIH) engine was an attempt to bridge the old and the new, to incorporate some up-and-coming features while using as many existing parts as possible. It's a transitional form, as it were, between '60s and '80s tech.

GM/Opel CIH Engine Timing Chain Guides & Potential Problems. May 11, 2019. Im writing this little post on some of this issues i have encountered when building my Opel Manta CIH engine due to the differences between the Original GM/OPEL timing chain guides and the aftermarket ones. It started off with me finding it very hard to fit the top chain sprocket onto the cam end and thinking was it the ...

GM 54-Degree V6 engine(I6) The Opel Cam-In-Headengine ("CIH" for short) is a series of inline engines which was built from 1965 until 1995 and was available in four- or six-cylinder configurations. Its name derives from the location of the camshaft, which was a compromise between an overhead valveand an overhead camlayout.

~~Opel Cam in head engine — Wikipedia Republished // WIKI 2~~

By 1986, the Family II unit had completely supplanted the CIH engine as Opel's core 4-cylinder powerplant. although the 6-cylinder versions of the CIH continued in the larger Omega and Senator models until 1995. In 2004, a 2.0 L MultiPower engine was made available for the taxi market which could use gasoline, alcohol, and natural gas.
