Your how-to guide to become a ham Ham radio, or amateur radio, is a way to talk with people around the world in real-time, or to send email without any sort of internet connection. It provides a way to keep in touch with friends and family, whether they are across town or across the country. It is also a very important emergency communication system. When cell phones, landlines, the internet, and other systems are down or overloaded, Amateur Radio still gets the message through. Radio amateurs, often called "hams," enjoy radio technology as a hobby, but are often called upon to provide vital service when regular communications systems fail. Ham Radio For Dummies is your guide to everything there is to know about ham radio. Plus, this updated edition provides new and additional information on digital mode operating, as well as use of amateur radio in student science and new operating events. • Set up your radio station • Design your ham shack • Provide support in emergencies and communicate with other hams • Study for the licensing exam and choose your call sign if you're looking to join a college radio club or just want to learn the latest tips and tricks, this book is a helpful reference guide to beginners, or those who have been "hams" for years.

Since it was first published in 1964, Professor Gottfried Bammes' Die Gestalt des Menschen has been considered the definitive book for artists learning to draw the human form. Deconstructing the body into its smallest components, Bammes asserts the importance of learning the structure of bones, muscles and parts in order to accurately draw a human figure. Whilst the original German has been sought after in the English speaking world, a translation has been long lamented. Now, for the first time, Bammes' most famous work has been translated by Search Press into the English language. Faithfully reproduced in translation, with over 540 original diagrams, drawings and photographs, and spanning over 500 pages, new and experienced artists can finally drink in the vast knowledge lovingly presented by the late professor.
